August 8, 2011

Lorri Grainawi, Director of Technical Services
Steel Tank Institute
944 Donata Court
Lake Zurich, IL 60047

Dear Lorri,

The purpose of this letter is to state that our underground steel tanks are suitable for use with biofuels. Specifically, we manufacture the following underground steel tanks:

- single-wall
- double-wall
- sti-P3®
- Non-UL storage vessels

All steel tanks are compatible and suitable for use with all blends fuels meeting ASTM standards, including ethanol blends from E10 to E100. All tanks are also compatible and suitable for use with all blends of biodiesel, from B2 to B100. Testing has been done proving compatibility of steel by several sources including Oak Ridge National Lab sponsored by DOE in collaboration with UL and NREL), SwRI, DNV and STI (through Battelle). To access test reports and other information on biofuels, follow this link: [Biofuel data, information and links](#)

As always, if switching product service, the tank system should be properly cleaned. See STI Recommended Practice, R111, "Storage Tank Maintenance" for further information.

Lancaster Tanks & Steel Products is a New York state business that has been manufacturing steel storage tanks since the 1940's and has been in the fabrication business since the 1920's. We can build tanks to UL 58, UL 142, UL 2085, and API-650 design standards. We have built tanks of all configurations in sizes up to 30,000 gallon capacity. The tanks are cylindrical, rectangular, single wall, double wall tanks in both horizontal and vertical configurations. As members of the Steel Tank Institute we build the Sti-P3, Flameshield, Fireguard, and Aquasweep licensed technologies.

We are committed to providing safe, quality, environmental sensible solutions for storage tanks. For more information about our company, please visit our website www.lancastertanks.com.

Please contact me if I can be of any assistance.

Sincerely,

Jerry Sheldon
